FROM THE DESK OF FOUNDER SECRETARY

For the period 2018-2019

CANCER FIGHT FOUNDATION, a Registered Trust was founded in 2015 and within two years we received 12A Registration Certificate from "Income Tax Department", "**Government of India**". We started our humble journey at **Chittaranjan National Cancer Institute (Operated by Government of India), Kolkata**.

Our Organization is headed by an eminent Physician, duly supported by a team of selfless and dedicated associates including myself, tiding over much stress and strains successfully since inception till date, to a comprehensive extent.

Our determination and concerted efforts were aimed to forge ahead with the Mission and Vision to take care of the child patients from below poverty level families, suffering from critical disease of **Leukaemia (Blood Cancer)**. The treatment of this disease is not only time consuming, it's very expensive as well. In addition, lack of adequate infrastructure at remote locations all over the State of West Bengal, which is our jurisdiction at present, add to their helplessness.

It is commonly believed by the concerned discipline of Medical Science and fraternity that Leukaemia is caused either through inheritance or environmental parameters. However, we have found through our extensive survey that the children with high White Blood Cell counts are victims of their poor mother's malnutrition owing to poverty, illiteracy and repeated pregnancy, as well. So the tasks of our Organization are multiplied to support them too, including counselling for a healthy sustenance.

Our second project is to look after of the adult patients suffering from **Colon Cancer**, undergoing treatment and providing them the necessary Stoma accessories free of cost, including temporary nursing care.

It is needless to mention that continued care of many patients is only possible, if funds are received regularly from generous donors. In order to carry out all our activities smoothly, to the entire relief and satisfaction of the concerned Cancer Patients under our care at present and also in future, sufficient financial support are required on a regular basis.

While concluding, I take this opportunity to thank one and all concerned, including our whole & part time members, without whose support and assistance, we could not have gained the momentum to accomplish the Constitutional objectives of our Organization till now.

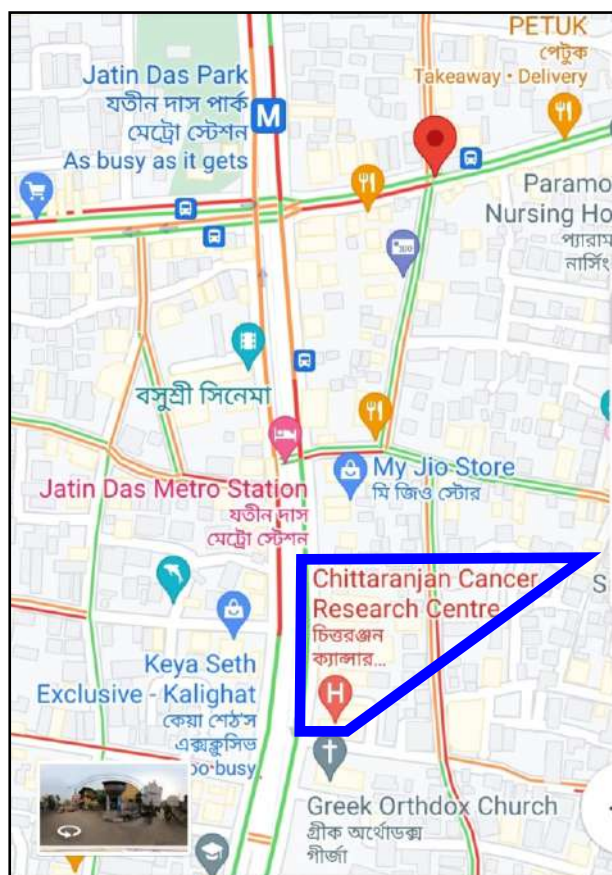

Let us stay blessed and lead a disease free life...

Susmita Banerjee

CFF Activities - 2018-2019

Stoma Care & Accessories

The Mission and Vision of Cancer Fight Foundation is to take utmost care particularly of children born with and / or undergoing treatment of Leukaemia (Blood Cancer) and Adults with Colon Cancer.

Cancer Fight Foundation (CFF) started its dedicated journey in the year 2015 activating our first project with patients suffering from Colorectal Cancer, who required Stoma Bags. As part of our team, we were fortunate enough to have an experienced Cancer Survivor who had fought and beaten Colorectal Cancer and now is eager to help others, suffering from the same disease.

We started our first project with the **Stoma Patients**, at Chittaranjan National Cancer Institute, (CNCI) Kolkata. Our job there is to provide moral support to the pre and post surgery patients and help them with Ostomy accessories as required. Simultaneously we guided the family members to handle the patient with proper hygiene and upliftment for their smooth livelihood.

Republic Day Celebration

Our second project was with the Child patients of the Paediatric Ward at **Chittaranjan National Cancer Institute, Kolkata**, who are suffering from the dreadful disease **Leukaemia (Blood Cancer)**. They needed various food supplements such as Horlicks, Complan, Padiasure etc for 365 days.

In addition to their dietary needs we also provided the 9 bedded Ward with entertainment on festivals such as Christmas and we organised events on special holidays such as Independence Day and Republic Day. By doing this, it helped to elevate the mood of the children and gave them slight relief from their gruelling medical treatment. It has also been proved that cancer patients need treatment not only for the disease, but also for the mental issues which affect them.

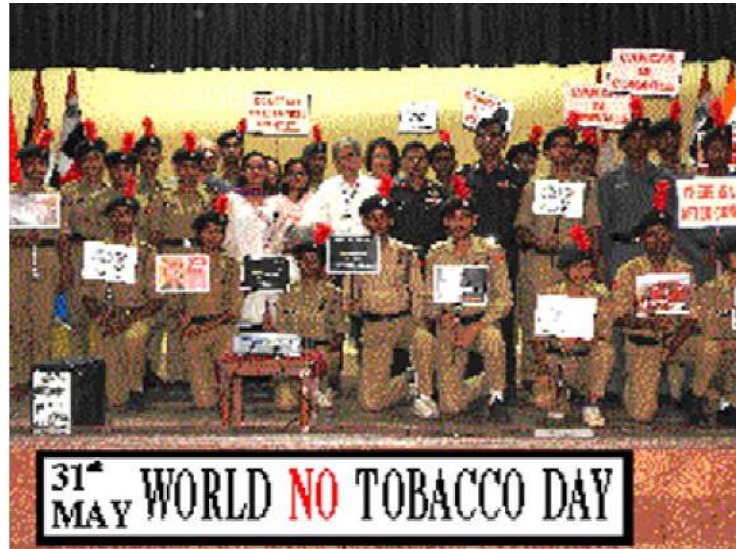

Independence Day Celebration

Christmas Day Celebration

As part of the ongoing Cancer Awareness Campaign, we conducted various camps to educate many NCC Cadets of Army, Navy and Air Force Divisions during their training. Subjects such as the fatal consequences of smoking, drinking and chewing tobacco were highlighted to them. Each year on 31st May, we conduct a special No Smoking Campaign for them.

FROM THE DESK OF FOUNDER SECRETARY

For the period 2019-2020

Upon successfully executing various assignments of our Organization during 2018 -19, we stepped into the second year, setting the goal to expand activities for reaching out to more and more Cancer patients in other Hospitals as well, who may need our care and continued support.

While supporting the Cancer patients at **Chittaranjan National Cancer Institute**, Kolkata, West Bengal, India. we also got an opportunity to work simultaneously with **Saroj Gupta Cancer and Research Institute**, Kolkata, West Bengal, India and to support the Colon Cancer patients for Urostomy, Colostomy and Ileostomy treatments, who have been struggling with their temporary or permanent Stoma bags.

A young Colon Cancer survivor Ms.Nabanita Mukherjee, works with us very joyfully to support and counsel the pre and post surgery Colon patients in the Hospitals. After their surgery immediately, the Doctor fixes a Stoma Bag in the Operation Theatre itself, according to the patients necessity. Then as the patient is shifted to the ward we start guiding them how to use and manage their bags on a daily basis.

We believe in our Organization's Mission that 'Where there is Hope, there is Life' and it is our Vision that all patients suffering from Colon Cancer should have a fulfilled life as they undergo their treatment. Our aim is to provide them with the best possible medical facilities and accessories available, extend psychological and emotional support to the patients and their family members as well. We also promote awareness for early detection of the disease, encourage time bound treatment and carry out various medical examinations to assist early diagnosis and possible cure to lead a happy and hope filled life ahead.

We are all aware that treatment of Cancer is very expensive. As such, self financing by our group members with limited means does not suffice. We therefore look forward to the kind gesture of the Donors far and wide.

Let us all remember that "Prevention is better than cure" and such possibility does exist...

CFF's Additional Activities in West Bengal, India during 2019-20

*Cancer Awareness Programs at various locations of
Hooghly, Birbhum & Murshidabad*

CFF Activities 2019- 2020

In 2019, we joined the team at **Saroj Gupta Cancer and Research Institute, Kolkata, India** to support the Colon Cancer patients. Every Friday we conduct Stoma Clinic where we counsel and train patients on stoma health and have a one to one consultation with them and their family members. Detailed databases are also maintained. Each patient is monitored on a regular basis.

In addition, Stoma Nurses Training Program takes place once a month at the Hospitals so that the Nurses can take care of the stoma patients who are admitted there.

After the patients are released from the Hospital, volunteers carry out home visits to train the caregivers thoroughly. After their treatment is completed, we encourage them to involve themselves in various activities such as sewing, singing, cooking, tailoring, Computer classes and Vocational Job oriented Training etc., to keep them happy and move forward joyfully, earning some money.

Stoma Accessories

Stoma Nurses Training Sessions

Various activities at the **PLAYROOM** of Chittaranjan National Cancer Institute, Kolkata, West Bengal.

In January 2019, a **PLAYROOM** was created for the child patients of the Paediatric Ward at Chittaranjan National Cancer Institute, Kolkata, West Bengal. Various puzzles, educational and recreational toys etc were put in place for their playful activities, to forget the painful treatment procedures to some extent temporarily. Every alternate day Yoga Sessions were also provided as this acted as a stress buster during their long and often painful stay in the Hospital.

Other objectives of Cancer Fight Foundation include a Rehabilitation Programme for Paediatric Cancer Survivors. In this programme we sponsored the rehabilitation of those children who are able to restart their education. We provided stationary, books and also pay for their education, tutoring and extra-curricular activities.

*Activities at the **Paediatric Ward***

We conducted Cancer awareness programmes at many remote villages in North 24 Parganas, West Bengal, India. where we spoke to various School and College students about the symptoms of cancer and how to change diet and lifestyle habits to prevent the disease. We also gave specialised training to women and young girls on Breast Cancer, it's causes, symptoms and how to do self breast examination which are vitally important for early detection of the disease.

FROM THE DESK OF FOUNDER SECRETARY

For the period 2020-2021

Our Organization then stepped into the third year of dedicated operations, as mentioned above, and got the valuable opportunity to associate ourselves with Narayana Superspeciality Hospital, Howrah, West Bengal, India.

By this time, we gained more experience and also came in contact with many more patients suffering from Cancer who heard about the devoted activities of our Organization, through various sources.

In 2020, we received the CSR Certificate no. CSR 00009535 and exemptions under Section 80G of Income Tax Act for receiving tax free donations.

After outbreak of the Covid19 Pandemic in March'2020, we supported some patients with their regular Stoma accessories and subsequently offered regular mental health counselling to both the patients and their families. During this crucial time we lost many patients too. With the permission of Police Authorities, we supported approximately 200 cancer patients and their families with dry ration, food supplements, hygiene products, chemotherapy drugs etc by delivering to the homes of many patients.

While working in the Hospitals continuously for so many years, we found that the Ward Boys and Nurses need proper guidance of correctly fixing various Stoma accessories to the patients during their stay in the Hospital. So, we started organising Stoma Nurses Training once a month at all the 3 Hospitals.

Furthermore, we are extending supportive care of the child patients, including rehabilitation and their education, Post treatment, are also undertaken by us, to the extent possible.

Palliative care of some terminally ill patients of all ages, counting helplessly the remaining days of their lives, when medical treatment becomes ineffective are also being looked after by us.

In order to fulfill this enormous enterprise of reaching out to more and more suffering families effectively, sufficient funds are required from broader avenues of our country and abroad, enabling us to meet the expenses at actuals, maintaining fullest transparency, by following the proper accounting procedures and legal norms.

We, therefore, request the esteemed Organizations and kind hearted individuals to extend their helping hands to us periodically, as much as possible, so that we can strive and thrive to move forward in seeing many smiling patients and survivors including their family members, who largely depend upon our wholehearted cooperation and continued support. We look forward to their kind patronage and physical verification of our various projects, suiting their convenience.

Let us all pray and take the best possible care of those who need our support....

Susmita Banerjee

- *Bardhaman-II*

CFF ACTIVITIES IN 2020 - 2021

By the end of 2019, we joined hands with **Narayana Superspeciality Hospital, Howrah** West Bengal, India to support Colon Cancer Patients. Till now, in 3 Hospitals, as stated above, we have supported more than 500 patients. When the Covid 19 Pandemic struck in 2020, we were unable to conduct our clinics in the hospitals regularly. But with the help of the database of patients, we contacted them remotely and did online counselling. Some patients who urgently needed Oral Chemotherapy medicines were visited all over West Bengal (with special permission from the Police). In addition, dry ration, Food Supplements, Hygiene Products, Chemotherapy Drugs etc were delivered to homes of many patients. Furthermore, activity kits were distributed amongst some children under our care, to keep them occupied during this phase of their lives.

Stoma Care

*Food support during COVID-19 Pandemic
during 2020-21*

Project Partha Pradhan :

One project which started in 2016 was named after our first Paediatric patient named Partho Pradhan. He succumbed to the disease aged six, so we organised a memorial programme at his School in Digha, West Bengal, India.

We created a Playroom there and each year we provide Books and Notebooks to all the students.

His family was given bereavement counselling and with their help we have conducted cancer awareness camps all over the vicinity thereof. This project demonstrates that losing a patient to cancer does not mean the end, there is life after cancer and Partha did not die in vain, he lives on in the work we do at his School and in his village.

Cancer Awareness Camps

Conclusion:

For any Organization like ours to exist and grow rapidly, funding is essential. As our activities are expanding steadily along with our experience with treatment of Cancer, very many projects are created and some are being planned for the future.

The treatment of cancer is expensive as much as the Pathological Tests that are required, including Scanning etc.

Our financial constraints have not allowed us to assist all the patients under our care so far with these procedures, but we hope to do so in future, after receiving sufficient donations.

CFF ACTIVITIES

Paintings by a Child Patient

Our future planning:

- Rehabilitation and sponsorship of Child and Adult Cancer survivors.
- Advanced treatment of Cancer of many more patients.
- Wide range of awareness programmes.
- Palliative Care - Dignity at the end, the creation of Shanti Bhavan.
- Various Bereavement Counselling and Advice Clinics.
- Online tutoring for children.
- Ongoing COVID support, till it is totally eradicated.

WE REMEMBER ALWAYS

THE SUPREME POWER HAS SOMETHING FOR US

A Key for every problem

A Light for every shadow

A Relief for every sorrow & A Plan for every tomorrow.
